

POST-DOC in Biochemistry/Chemical Biology at the Univ. of MUNICH

The project concerns the recognition of proteins by foldamer-peptide macrocycles in the context of epigenetic research. See:

[Nat. Chem. 2018, 10, 51](#)

[Chem. Sci. 2021, 12, 11004](#)

[ChemRxiv 2022](#)

Desired profile:

Background in biochemistry, chemical biology, peptide/protein chemistry

Previous experience in some of the following: protein production, protein chemistry, display selection, biophysics, peptide synthesis, cell assays

Creativity, autonomy, leadership skills

Wish to work in a multidisciplinary environment at the chemistry-biology interface.

Applications:

Send a CV, motivation letter, and ask two recommendation letters to be sent by e-mail to:

Prof. Ivan HUC (ivan.huc@lmu.de)

Deadline: March 15th 2022

Start date: flexible – as soon as possible

See the group website: <https://huc.cup.uni-muenchen.de/>
