

We are looking for talented candidates to fill two postdoctoral positions at the Institute of Chemical Sciences (ISCR - UMR 6226 CNRS) of the University of Rennes 1:

- 1) industrially-funded project on the olefin polymerization metallocene catalysis
- 2) project on the development of original FLP incorporating main-block or transition metals (e.g. lanthanides) for activation of small molecules (CO_2 , CH_4 , H_2)
